

Care for

# Resin veneers

- 1.** Proper brushing and flossing technique.
- 2.** In office cleaning and brushing every 6 months.
- 3.** Night guard must be used if patient has traumatic bite, bruxism.
- 4.** Avoid eating or drinking things with too much color pigmentation, due to the fact that veneers pigment much faster than natural teeth.
- 5.** Do not eat foods that are extremely hard with veneers.
